

## Advanced Products facility taking shape

A390  
KMF (Precision Sheet Metal)'s new 'Advanced Products' manufacturing facility is a hive of activity ahead of its February 2011 opening. The most recent arrivals are two Amada HFP 50-20 press brakes.

"The new Advanced Products facility is generating a lot of excitement both internally and externally. The delivery of new equipment, such as the two press brakes, is an indication of the level of commitment that is in place," says Keith Nicholl, KMF's business improvement manager.
