

# Further expansion at KMF

Such are the encouraging signs at Newcastle-under-Lyme based KMF Precision Sheet Metal, that in the first quarter of its financial year it has committed to further expansion of its manufacturing plant. This success is continuing into the company's new financial year with record sales of £6 million being recorded during April, May and June (on track for 15% growth).

In the aerospace sector alone, KMF has increased turnover on the back of its commitment to investing in specific skill sets, creating dedicated manufacturing teams and gaining accreditations to meet the needs of a customer in the premium aircraft seating sector. It has taken responsibility for the manufacture of the chassis of these complex aircraft seats

(pictured), initiating a 'Direct Line Feed' to ensure parts are supplied to the assembly facility as and

when they are required.
