

New faces at KMF

Already reporting record turnover for the first quarter of its financial year, Newcastle under Lyme-based KMF (Precision Sheet Metal) Ltd is determined to continue the trend, a situation that will be helped following the appointment of Trevor Leadbeater (*pictured*) and Radim Vaculin as business development managers. Mr Leadbeater will put his experience of the electrical/wiring harness/construction industries with companies such as 3M, Rists Ltd and Sibelco to good use in identifying new opportunities across the UK for KMF's core business of metal fabrication and electronic integration.
